Education

University of Pittsburgh
B.S. in Computer Science

Aug. 2020 – Exp. May 2023
GPA: 3.86/4.0

Relevant Coursework:

- Data Structures, Algorithms, Computer Networks, Operating Systems, Applied Crypto. and Network Sec., Systems Software, Computer Vision, Computational Linguistics, Formal Methods in C.S., Computer Organization, Calculus 3, Linear Algebra, Physics 1 & 2

Experience

IBM Cloud
Software Engineer Intern

May 2022 – Aug. 2022
Durham, NC (Remote)

- Worked in an agile, collaborative DevOps environment to develop and configure systems and services.
- Launched quality code, with suitable tests, into production for a feature I implemented within the first 3 weeks of starting in Golang, which I had zero previous knowledge of.
- Worked on Open Source Software license scanning and improved configuration for New Relic performance monitoring tool for all my team's Node-based microservices.
- Automated a tedious, manual task of configuring and deploying LogDNA setups for different microservices and all of their respective regions using Terraform; saving teams valuable time and from human-errors in their workflows.

Projects

New Music Discord Bot

<https://git.io/JLR4G>

- Discord bot that checks for new music from added artists daily at both midnight and noon.
- Created using Discord API, Discord.js, Firebase database, and Spotify API; hosted on Heroku.

TCP Implementation

[Available upon request](#)

- Implemented a subset of the Transmission Control Protocol (TCP) in C.
- Includes concurrent packet timeouts to recover from packet loss.
- Successfully communicates with any other TCP implementation.

Culture Vultures

<https://git.io/JUmpJ>

- Android Instagram clone targeted for a niche online subculture.
- Implemented features including: user sign-in, photo upload, and user search querying.
- Front-end built in Java and XML, backend in Java, and data hosted on Firebase.

Skills

Languages: C/C++, Go, Python, Java, JavaScript, Matlab, Shell (fish, Zsh, bash), Assembly (MIPS)
Technologies and Tools: GNU/Linux (Arch BTW), Docker, Terraform, NeoVim, Git/GitHub, RegEx.
